WATER PUMP GUARD INSTALLATION INSTRUCTIONS

1. You will first need to drain the coolant. Using a T30 torques bit, remove the lower most water pump cover bolt and have a container ready to catch the coolant. You will need to loosen the radiator cap to get the coolant to come out. Once the coolant is drained you can reinstall the bolt. (FIG 1)
2. Using the same T30 bit, remove the top three water pump mounting bolts (FIG 2)
3. Using the T30 bit or an 8mm T Handle or socket, install the EE water pump cover guard with the 2 provided 6x55mm bolts in the forward 2 mounting points and the provided 6x30mm bolt in the rear mounting point. All 3 bolts can be tightened at this time (FIG 3)
4. Refill the radiators with the coolant removed in step 1.
5. Have fun and enjoy your next ride!
